Ultrasound Speech Therapy Clinic

Ages: age 7+ (grouped by developmental level)

Focus: Speech sound disorders using Ultrasound Biofeedback Therapy, particularly helpful for children struggling with sounds that are difficult to see (such as /r/ and palatal sounds).

Children may participate in the Ultrasound Biofeedback Clinic, which allows them to see their tongue movements in real time to improve speech sound accuracy.

- Individual or small group depending on enrollment
- **Will be billed as regular therapy (\$80/session) or through insurance**

Speech Sound Disorders Camp

Ages: All ages (grouped by developmental level)

Focus: Articulation and phonological disorders

Activities Include

- Traditional articulation therapy
- Cycles approach for phonological patterns/Drill-play therapy for high repetition/Structured speech games

Literacy & Language Camp

Ages: 5–9 or 9–11

Focus: Early literacy and reading intervention for children with needs in:

- Decoding/Phonological awareness/Language comprehension

Activities Include

- Evidence-based literacy instruction/Story retelling and sequencing/Vocabulary expansion/Word building activities/Listening comprehension centers/Interactive literacy games

Social Communication Camp

Ages: Elementary • Middle School • High School/College

Focus: Students with social communication challenges, including those with Autism Spectrum Disorder.

Activities Include

- Conversation skills practice/Topic maintenance strategies/Perspective taking activities
- Social problem-solving scenarios/Role-playing real-life situations/Collaborative games

Play-Based Language Camp

Ages: Toddlers, Preschoolers, Kindergarten

Focus: Develop expressive and receptive language through cooperative play.

Activities Include

- Thematic play centers (kitchen, store, doctor, transportation)/Guided group play/Storytime with interactive props/Music and movement activities
