Computer Science in Modern Biology Workshop

Miami University
August 8th-12th
Online courses

Do you plan to go into a biological or medical research career, but don't know much about research or computer science? Learn valuable computer science skills that you will use in your future careers and look great on your college application!

In this workshop you will:

Get an introduction to coding languages of your choice, genetics, ecology, physiology & more!

Manage and analyze real biological data produced by professional researchers

Attend exclusive networking events for biologists, with tips on how to be successful in research

Registration is FREE and first-come-first serve
